DETAILED ACTION

1. This action is in response to the request for continued examination filed 7/19/10. As directed by the amendment, claims 1, 6, 33, 47-54, and 56-62 are pending in the instant application and also allowable for reasons discussed below.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: when read in light of the limitations of the claimed fluid dispensing device, the prior art of record by itself or in combination does not disclose the specific structure and relationship as recited in claim 1 such that a pre-load is formed by one of the surfaces of the actuating member or finger-operable lever, having a dual-gradient profile with first and second portions being concave, high gradient and convex, low gradient respectively, such that the finger-operable lever is not able to transfer any significant force to the container along the longitudinal axis until the predetermined force is applied.

The closest prior art references are: Davies (2005/0224525), Simon et al. (WO 03/029105), and Grychowski et al. (6,745,760) which all relate to fluid dispensing devices with finger-operable levers.

The prior art of record does not disclose the structural limitations related to the pre-load being formed by one of the surfaces (of the actuating member or lever) having a dual-gradient profile including a first, concave, high gradient and a second, convex, low gradient as discussed above.

Note that the submitted drawings on 7/19/10 as requested in the previous office action mailed 4/21/10 have corrected the issues regarding not all allowable subject matter shown in the drawings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
